MOLD

Important Features

- lasts up to one year
- replaces hard to find sizes
- cuts to fit almost any size

Item Number: SM100S

Vendor Case Quantity: 12pk.

The NaturalAire Synthetic Cut to Fit is easily cut using heavy shears or a razor knife to create almost any size one-inch air filter for furnace and central air systems. It's synthetic fibers do not support the growth of odor causing microbials and can be washed and reused several times. It is a self supporting filter, so just cut and install. Moreover, it is the ideal replacement for hard to find or special filter sizes.
