## ASPHALT ROOF COATINGS

### Grip-Rite Asphalt Roof Coating - Fibered

- ✓ Premium cold-applied, brush or spray-grade asphalt coating
- ✓ Penetrating-type protective coating provides tough, durable, weather-resistant film
- ✓ Solvent system works at lower temperatures than with asphalt emulsions
- ✓ Coating won't wash off if unexpected rain occurs before curing
- ✓ Use on:
  - Smooth surface roofs
  - Asphalt roofs
  - Metal roofs
  - Dried-out composition roofs (except for asphalt shingle)

Size	Units/ Carton	Units/ Pallet	SKU
<b>Asphalt Roof Coating - Fibered</b>

SKUs vary by region.

### Grip-Rite Asphalt Emulsion Roof Coating - Fibered

- ✓ Premium, versatile coating for the protection of roofing materials, metal, and masonry surfaces
- ✓ Cold-applied, corrosion-resistant, and waterproof when dry
- ✓ Does not crack, "alligator," run, or sag under extreme weather conditions
- ✓ Water-based, solvent-free formula; no strong odor and a quick, easy clean-up
- ✓ Most effective in temperatures above 50°F
- ✓ Use on:
  - Smooth surface roofs
  - Asphalt roofs
  - Metal roofs
  - Dried-out composition roofs (except for asphalt shingle)

SKUs vary by region.

### Grip-Rite Elastomeric White Roof Coating

- ☑ Premium, water based-acrylic latex coating used in a variety of maintenance coating applications to give superior reflectivity, energy savings and extend roof service life
- ☑ Pliable, monolithic, weather and fungus resistant protective coating
- ☑ VOC compliant and UL & FM approved
- ☑ Water-based, solvent-free formula; no strong odor and a quick, easy clean-up
- ☑ Used only when temperatures are consistently above 50°F
- ☑ Use on:
  - Well-drained surfaces which do not “pond” water
  - Conventional or SBS mineral surface cap sheet
  - Smooth surface built-up roofing, SBS, APP or metal which has first been coated with conventional Grip-Rite Asphalt Emulsion Roof Coating
  - Roof surfaces previously coated with white or aluminum (aluminum must be allowed to weather before coating with Grip-Rite Elastomeric White Roof Coating)
  - Stucco parapet walls

## COLD-APPLIED ADHESIVES

### Grip-Rite Cold Process Adhesive - Blind Nailing Cement

- ✓ Premium, brush and spray grade, waterproof adhesive made from asphalt, solvents, and organic fibers
- ✓ Designed for bonding layers of asphalt coated base sheets as a replacement for hot asphalt in built-up roofing (BUR) applications
- ✓ Provides greater cold-weather flexibility
- ✓ Allows longer working time
- ✓ Use for:
  - Adhering smooth and granule surface rolled roofing
  - Bonding asphalt-coated roofing sheets

Size	Units/ Carton	Units/ Pallet	SKU

## ROOF SEALANT

### Grip-Rite Elastomeric White Acrylic Roofing Sealant

- ✓ Specially formulated for repairing and preventing roof leaks prior to coating with an acrylic reflective coating
- ✓ Will not crack, craze, or lose adhesion when applied as directed to a smooth, clean, sound roof surface
- ✓ Water-based, solvent-free formula; no strong odor and a quick, easy clean-up
- ✓ For use on:
  - Standard mineral surface cap sheet
  - Previously-coated asphalt roofs
  - Concrete and stucco parapet walls
  - Smooth-surface built up roofing
  - SBS modified roofing
  - Weathered metal roofs
