	bitten areas as needed.
CTION 5. FIREFIGHTING MEA	SURES
Suitable extinguishing media	 The product is not flammable. ASHRAE 34 Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Specific hazards during firefighting	 This product is not flammable at ambient temperatures and atmospheric pressure. However, this material can ignite when mixed with air under pressure and exposed to strong ignition sources. Contents under pressure. Container may rupture on heating. Cool closed containers exposed to fire with water spray. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Fire may cause evolution of: Hydrogen fluoride Carbon oxides Halogenated compounds Carbonyl halides
Special protective equipment for firefighters	: Wear self-contained breathing apparatus and protective suit.
Further information	: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
CTION 6. ACCIDENTAL RELE	ASE MEASURES
Personal precautions, protective equipment and emergency procedures	 Wear personal protective equipment. Immediately evacuate personnel to safe areas. Keep people away from and upwind of spill/leak. Remove all sources of ignition. Avoid skin contact with leaking liquid (danger of frostbite). Ventilate the area. After release, disperses into the air.
